

**DESCRIZIONE / Description**

- Taglierina da banco carenata, in alluminio, con disco in acciaio chiuso all' interno, per tubi flessibili oleodinamici fino a 1"1/2\*.
- Bench faired cutter, made of aluminum, with internal steel disk, for hydraulic hoses up to 1"1/2\*.

**SCHEDA TECNICA / Data Sheet**

|                                                   |                                      |
|---------------------------------------------------|--------------------------------------|
| Taglio massimo su tubo 4SP / Maximum 4SP cutting  | 1.1/2**                              |
| Taglio ottimale su tubo 4SP / Optimal 4SP cutting | 1.1/4**                              |
| Taglio ottimale su tubo R2 / Optimal R2           | 1.1/2**                              |
| Diametro max di taglio / Maximum cutting diameter | 70mm (2,76")                         |
| Giri al minuto / RPM                              | 2900                                 |
| Diametro lama / Blade diameter                    | Ø250mm (9,84")                       |
| Peso / Weight                                     | 30Kg (66,14Lb)                       |
| Dimensione LxPxH / Dimension                      | 600x400x280mm (23,62"x15,75"x11,02") |
| Voltaggio standard / Standard voltage             | 400V-50/60Hz                         |
| Potenza del motore / Power source                 | 2,2kw (3Hp)                          |

= di serie / standard

**ACCESSORI / Accessories**

|                                                                                                                         |                                                                                                                             |                                                                                                              |                                                                        |                                                                                                                |                                                                       |
